

FALL ACTIVITY READING

Name: _____

Date: _____

Fall is a beautiful time of year. It is usually cooler than summer, but not as cold as winter. Leaves begin to change color and fall from the trees. It is also the time for students to return to school and begin another year of studying.

In fall, many people begin to wear heavier clothes to stay warm. A nice sweater, scarf, or a coat usually does the job.

The cooler weather helps create some amazing natural colors. Leaves begin to change color, from green to yellow, orange, red, and brown.

In August and September students go back to school after their summer vacation and continue their academic studies. While some kids look forward to seeing their classrooms again, others dread and fear it.

The natural beauty, weather, and start of a new school year make fall a great time of year.

1. What is fall like? How is the weather?

2. What happens to trees in the fall? How do they change?

3. What kind of clothes do people wear in fall?

4. What do students do in fall?

5. What do you think about fall?
